

We have openings for experienced structural project engineers to join both our Atlanta office and West Hartford office.

The qualified candidate must have a minimum of two (2) years of structural design experience in the design and construction industry.

The qualified candidate should be a self-motivated professional who can work within a strong team environment, serving clients on projects throughout the United States. Clients will include Architects, Developers, and Contractors.

In addition to the skills listed, the qualified candidate should possess a strong customer service attitude.

Desired Skills & Experience:

Minimum of 2 years of structural design experience in the design and construction industry
Bachelor's degree in Civil Engineering or a related field. Master's degree in Structural Engineering is a plus

Experienced with BIM and Revit Structure tools

Knowledgeable in design, drawing, specification and construction administration tasks

Ability to work in a team environment

Commitment to high-quality standards in the built environment

Proactive, skilled and assertive in problem solving

Ability to work within confined deadlines

Ethical in all business dealings, and willing to put the greater good ahead of personal gain

Good written and oral communications skills
