

We have openings for experienced structural engineers to join both our Atlanta office and West Hartford office.

The qualified candidate must have a minimum of eight (8) years of structural design experience in commercial buildings.

The qualified candidate should be a self-motivated professional who can work within a strong team environment, serving clients on projects throughout the United States. Clients will include Architects, Developers, and Contractors.

In addition to the skills listed, the qualified candidate should possess a strong customer service attitude.

Desired Skills & Experience:

8 years of experience in commercial building design

Master's in Civil Engineering with an emphasis in Structural Engineering

A Georgia PE license or a PE/SE in another state

Strong organizational and communication skills

Well-versed in building design codes

Exposure to and an understanding of Revit software
