

We are seeking experienced structural project managers to join both our Atlanta and West Hartford teams.

The qualified candidate must be a licensed P.E. or S.E. and have a minimum of eight (8) years of experience in the structural design of timber, steel, concrete, and masonry structures.

Responsibilities:

- Assist Principal-in-Charge with project scope and fee development.
- Plan projects, maintain schedules, and budget in the following market sectors: Commercial Office, Government (Local, State, and Federal), Healthcare, Higher Education, Hospitality, Industrial, K-12 Education, Mixed Use, Movie Studios, Multi-Family, Recreation, Religious, and Retail.
- Work with the Engineer of Record to develop structural concepts for projects.
- Maintain quality control of projects.
- Mentor and train team members.
- Maintain client relationships and exceed client expectations.

Desired Skills & Experience:

- Licensed P.E. or S.E. with a minimum of eight (8) years of structural experience.
- Self-motivated professional who can work and collaborate in a team environment.
- Experience with commercial design software including but not limited to Bentley products, CSI products, ENERCALC, Adapt, etc.
- Experience with Autodesk Revit Structure software.
- Well-versed in building design codes and reference standards.
- Strong written and oral communication skills.
